

**RUDOLF HERMANN'S  
AWARD FOR SCIENTIFIC  
ACHIEVEMENTS IN VITICULTURE,  
OENOLOGY AND HORTICULTURE  
AT GEISENHEIM UNIVERSITY,  
GERMANY**

---

**In support of outstanding research, the Rudolf Hermanns foundation can issue awards of up to 10,000 € for researchers from European institutions.**

Prerequisite is the confirmed excellence of research in the fields of viticulture, oenology or horticulture.

Scientific projects and research achievements must be clearly documented for internal and/or external evaluation through peer review.

The following examples will be considered as proof of excellence:

- publications in recognized scientific journals, or in certain cases, the respective manuscripts
- general recognition by the scientific community or specialists in the respective field of research in the form of recommendation letters
- outstanding doctoral theses

The prize can also be awarded for work in progress, if results show a high probability that scientific excellence can be achieved.

Eligible are achievements reported during the most recent calendar year. Junior scientists are especially encouraged to apply.

If the recipient of an award is a working group or an institution, the prize money can only be used to support specific research projects. The trustees determine the allocation to the individual prize categories depending on quality and ranking. They also determine the number of prizes, depending on the quality of work and the funds available. The decision is binding with no right of appeal.

Applications should consist of a *curriculum vitae (cv)*, a detailed description of the research project, a list of publications and two letters of recommendation.

Deadline is the 31 March 2020

**Applications or requests for more information:**
